

Types of ANOVAs (Analysis of Variance)

- i) one-way Anova ✓
- ii) Repeated measures Anova ✓
- iii) Factorial Anova ✓

Types

i) One-way Anova:-

one factor with atleast 2 levels, these levels are Independent

Eg :-

new medication (10mg, 20mg, 30mg)

Rolling

Level 1 Dosage	Medications [Factor]		
	10mg	20mg	30mg
No. of Pedals	5	7	6
Level-2	8	9	10
	12	13	14
	15	12	18

pick ball bag
R, B
↓
dependent

2) Repeated measures Anova:-

One factor with atleast 2 levels are dependent

Physical Activity		Running → Factor		
1-10 pushup	Level	Day 1	Day 2	Day 3
50-100 pushup	1st per	8Km	5Km	10Km
	2nd per	4Km	3Km	5Km
	3rd per			
	n			

iii) Factorial Anova

Two or more factors of which with at least 2 levels, levels can be independent or dependent

Running → Factor

	Unit	Day 1	Day 2	Day 3
Male	1st	5	8	3
Female	2nd	10	12	21
	3rd	5	8	10

(1) Null (H_0)
 Alt (H_1) } test $\rightarrow$ Conclusion.
