

Population data

Def:- Entire set of Individual or object of Interest in a Particular study

Chars:-

i) Complete set

ii) Parameters $\rightarrow$ A numeric value summarizing Entire Population

Population mean (μ)

Population variance (σ^2)

Eg i) All students in school
 $\downarrow$
Population

ii) Market Research

i) All reviews $\rightarrow$ Population data

Sample data:

Def:- A sample of subject of the Population used for making a conclusion about whole Population. $\rightarrow$ 1% 10%

Chars

i) Sub set (Sampling)

ii) Statistics

[Sample Mean

Sample Variance]

iii) Random Sampling

(50) $\rightarrow$ (800)

i) All student of a class in a school

ii) Market Research

(50) $\rightarrow$ 10-20
