

# Types of Sampling

1) Probability Sampling

2) Non Probability Sampling

1) Probability Sampling

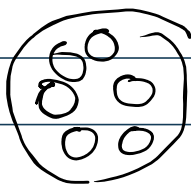

i) Simple Random Sampling

→ Every observation has an equal chance of being selected.

ii) Systematic Sampling

→ Every  $n^{\text{th}}$  observation of the Population data randomly

iii) Stratified Sampling

Divide Population into strata (groups) based on character randomly sampled from each strata

iv) Cluster Sampling

Divide into clusters the Random Sampling is done

v) Multi Stage Sampling

ii) Non Probability Sampling techniques

→ Select Individuals who are easiest to reach

1) Convenience Sampling

2) Judgmental Sampling

Result Judgment

3) Quota Sampling

' Result Judgement

3) Snowball Sampling

Peer discuss → Sampling too

4) Quota Sampling —

→ Age

→ Caste

→ Region
