

Sample Variance

$$s^2 = \frac{\sum_{i=1}^n (x_i - \bar{x})^2}{n-1} \quad ??$$

Imp Inter question

Bessel correction

Agus = { - - - - - }

$$\bar{x} \ll \mu$$

$$s^2 \ll \sigma^2$$

$n-1$? $\rightarrow$ Degree of freedom

$$\bar{x} \approx \mu$$

$$s^2 \approx \sigma^2$$

Bessel correction
